A COMMUNITY FOR PEOPLE WHO VALUE COMMUNITY

Agenda

GHI Storm Water Management Subcommittee Work Session – June 29, 2022

1. Welcome to visitors
2. Discuss questions raised by member review and comment
 - a. Should we have the background and definitions before the rules in the Impervious Surface Rules?
 - b. The Impervious Surface Rules do not currently address flagstones. Should we add flagstones? If we add flagstones, should they be included with another material (e.g., bricks) or have its own separate section?
 - c. Should the Subcommittee suggest that all materials related to rainbarrels be consolidated into a single section? If so, which section would be most appropriate?
 - d. Should previously existing impervious exterior surface structures such as patios and decks count against the total maximum allowable square footage noted in the rules?
3. Discuss draft responses to comments
4. Discuss revisions to New Direction Rule
5. Discuss revisions to New Section XK. Runoff Capture and Control Requirements
